HAEMATOLOGY REPORT
Report No. HC-20261028-1455
28 Oct 2026, 02:55 PM
Peripheral blood smear

Manual Differential Leucocyte Count

Leucocytes counted: 102 / Target 200

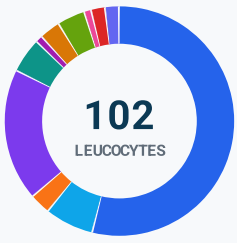

PATIENT NAME **Rahul Deshmukh**	AGE / SEX **46 years / Male**	SAMPLE ID **HC-2410-0187**
REFERRED BY **Dr. S. Patil (Medicine)**	WARD / OPD **Ward 12 · Bed 7**	SPECIMEN **EDTA peripheral blood smear**

DIFFERENTIAL LEUCOCYTE COUNT

CELL TYPE	COUNT	PERCENT %	ABSOLUTE ×10³/µL	NORMAL RANGE %	NORMAL RANGE ×10³/µL	FLAG
Neutrophils	55	53.9	9.47	40 – 80	2.0 – 7.0	H
Band Neutrophils	7	6.9	1.21	0 – 5	—	H
Eosinophils	3	2.9	0.52	1 – 6	0.02 – 0.5	H
Lymphocytes	19	18.6	3.27	20 – 40	1.0 – 3.0	H
Monocytes	5	4.9	0.86	2 – 10	0.2 – 1.0	
Basophils	1	1.0	0.17	0 – 2	0.02 – 0.1	H
Metamyelocytes	3	2.9	0.52	0	—	PRESENT
Myelocytes	4	3.9	0.69	0	—	PRESENT
Promyelocytes	1	1.0	0.17	0	—	PRESENT
Blasts	2	2.0	0.34	0	—	PRESENT
Atypical Lymphocytes	2	2.0	0.34	0	—	PRESENT
Total leucocytes counted	**102**	**100.0**	**17.57**	—	4.0 – 10.0	H
Nucleated Red Cells (not included in leucocyte total)				**6 counted · 5.9 per 100 leucocytes**		PRESENT

LEUCOCYTE INDICES & DISTRIBUTION

Total leucocyte count (analyser) Normal range 4.0 – 10.0 ×10³/µL	**18.60 ×10³/µL** H
Nucleated red cells Correction applied at ≥ 5 per 100 leucocytes	**5.9 / 100 WBC**
Corrected leucocyte count TLC × 100 ÷ (100 + nRBC per 100 WBC)	**17.57 ×10³/µL** H
Absolute neutrophil count (segmented + band)	**10.68 ×10³/µL**

Neutrophils	53.9%
Lymphocytes	18.6%
Band Neutrophils	6.9%
Monocytes	4.9%
Myelocytes	3.9%
Eosinophils	2.9%
Metamyelocytes	2.9%
Blasts	2.0%

CLINICAL ALERTS

- Blasts seen (2.0%) — urgent pathologist review recommended.
- Promyelocytes seen (1.0%) — correlate clinically; exclude acute promyelocytic leukaemia if prominent.
- Immature granulocytes with nucleated red cells — leucoerythroblastic picture.
- Atypical (reactive) lymphocytes seen (2.0%).
- Nucleated red cells 5.9 / 100 leucocytes — total leucocyte count corrected.
- Differential based on 102 cells (target 200).

RED CELL & PLATELET MORPHOLOGY

Anisocytosis	2+	Poikilocytosis	1+	Hypochromia	1+	Target cells	Nil
Schistocytes	1+	Platelet clumping	Nil	Platelets (smear)	Reduced		

Reference intervals (adults): Bain BJ et al. Dacie & Lewis Practical Haematology, 12th ed. (Ch. 2 & 5); Greer JP et al. Wintrobe's Clinical Hematology, 14th ed.; Kaushansky K et al. Williams Hematology, 10th ed.; WHO Classification of Haematolymphoid Tumours, 5th ed.. H = above and L = below the reference interval; "Present" = cell type not normally seen in peripheral blood. Absolute counts in ×10³/µL (equivalent to ×10⁹/L).

IMPRESSION / REMARKS

Neutrophilic leucocytosis with left shift and occasional blasts. Suggest bone marrow examination.

SUGGESTED FURTHER INVESTIGATIONS

AI-assisted · OpenRouter · openrouter/auto

Decision support only — generated by an AI model from de-identified data; not a diagnosis. Verify against the smear and clinical findings.

- Repeat peripheral smear review with platelet count confirmation
- BCR::ABL1 by RT-PCR / FISH
- Bone marrow aspiration and trephine biopsy
- Blood culture, CRP and procalcitonin
