HAEMATOLOGY REPORT
Report No. HC-20261028-1444
28 Oct 2026, 02:44 PM
Peripheral blood smear

# Manual Differential Leucocyte Count

Leucocytes counted: 102 / Target 200

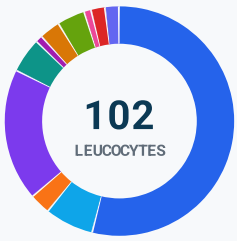

| | | |
|---|---|---|
| PATIENT NAME<br>**Rahul Deshmukh** | AGE / SEX<br>**46 years / Male** | SAMPLE ID<br>**HC-2410-0187** |
| REFERRED BY<br>**Dr. S. Patil (Medicine)** | WARD / OPD<br>**Ward 12 · Bed 7** | SPECIMEN<br>**EDTA peripheral blood smear** |

## DIFFERENTIAL LEUCOCYTE COUNT

| CELL TYPE | COUNT | PERCENT % | ABSOLUTE ×10³/µL | NORMAL RANGE % | NORMAL RANGE ×10³/µL | FLAG |
|---|---|---|---|---|---|---|
| Neutrophils | 55 | 53.9 | 9.47 | 40 – 80 | 2.0 – 7.0 | H |
| Band Neutrophils | 7 | 6.9 | 1.21 | 0 – 5 | — | H |
| Eosinophils | 3 | 2.9 | 0.52 | 1 – 6 | 0.02 – 0.5 | H |
| Lymphocytes | 19 | 18.6 | 3.27 | 20 – 40 | 1.0 – 3.0 | H |
| Monocytes | 5 | 4.9 | 0.86 | 2 – 10 | 0.2 – 1.0 | |
| Basophils | 1 | 1.0 | 0.17 | 0 – 2 | 0.02 – 0.1 | H |
| Metamyelocytes | 3 | 2.9 | 0.52 | 0 | — | PRESENT |
| Myelocytes | 4 | 3.9 | 0.69 | 0 | — | PRESENT |
| Promyelocytes | 1 | 1.0 | 0.17 | 0 | — | PRESENT |
| Blasts | 2 | 2.0 | 0.34 | 0 | — | PRESENT |
| Atypical Lymphocytes | 2 | 2.0 | 0.34 | 0 | — | PRESENT |
| **Total leucocytes counted** | **102** | **100.0** | **17.57** | — | 4.0 – 10.0 | H |
| Nucleated Red Cells (not included in leucocyte total) | | | | **6 counted · 5.9 per 100 leucocyt** | | PRESENT |

## LEUCOCYTE INDICES & DISTRIBUTION

| | |
|---|---|
| Total leucocyte count (analyser)<br>Normal range 4.0 – 10.0 ×10³/µL | **18.60 ×10³/µL** H |
| Nucleated red cells<br>Correction applied at ≥ 5 per 100 leucocytes | **5.9 / 100 WBC** |
| Corrected leucocyte count<br>TLC × 100 ÷ (100 + nRBC per 100 WBC) | **17.57 ×10³/µL** H |
| Absolute neutrophil count (segmented + band) | **10.68 ×10³/µL** |

| | |
|---|---|
| Neutrophils | 53.9% |
| Lymphocytes | 18.6% |
| Band Neutrophils | 6.9% |
| Monocytes | 4.9% |
| Myelocytes | 3.9% |
| Eosinophils | 2.9% |
| Metamyelocytes | 2.9% |
| Blasts | 2.0% |

## CLINICAL ALERTS

- Blasts seen (2.0%) — urgent pathologist review recommended.
- Promyelocytes seen (1.0%) — correlate clinically; exclude acute promyelocytic leukaemia if prominent.
- Immature granulocytes with nucleated red cells — leucoerythroblastic picture.
- Atypical (reactive) lymphocytes seen (2.0%).
- Nucleated red cells 5.9 / 100 leucocytes — total leucocyte count corrected.
- Differential based on 102 cells (target 200).

## RED CELL & PLATELET MORPHOLOGY

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Anisocytosis | 2+ | Poikilocytosis | 1+ | Hypochromia | 1+ | Target cells | Nil |
| Schistocytes | 1+ | Platelet clumping | Nil | Platelets (smear) | Reduced | | |

Reference intervals (adults): Bain BJ et al. Dacie & Lewis Practical Haematology, 12th ed. (Ch. 2 & 5); Greer JP et al. Wintrobe's Clinical Hematology, 14th ed.; Kaushansky K et al. Williams Hematology, 10th ed.; WHO Classification of Haematolymphoid Tumours, 5th ed.. H = above and L = below the reference interval; "Present" = cell type not normally seen in peripheral blood. Absolute counts in ×10³/µL (equivalent to ×10⁹/L).

## IMPRESSION / REMARKS

Neutrophilic leucocytosis with left shift and occasional blasts. Suggest bone marrow examination.

## SUGGESTED FURTHER INVESTIGATIONS

AI-assisted · OpenRouter · openrouter/auto

Decision support only — generated by an AI model from de-identified data; not a diagnosis. Verify against the smear and clinical findings.

- Repeat peripheral smear review with platelet count confirmation
- BCR::ABL1 by RT-PCR / FISH
- Bone marrow aspiration and trephine biopsy
- Blood culture, CRP and procalcitonin
